

STEPHENSON COUNTY RECORDER'S OFFICE

Beginning Monday November 27th we will be implementing a new software that will replace the DevNet Recorder of Deeds software. As we move closer to our implementation date we wanted to take a moment and further explain how these changes may impact our searching community.

Current DevNet customers will continue to seek data and images within the current DevNet system until the final conversion process has been completed. The final conversion should take approximately 15 days.

The Recorder's office will begin recording new data and images from November 27th forward into the new recording software. To obtain data/images from November 27th forward our searching community will need to seek a Laredo Subscription. Laredo is a subscription based product; Laredo requires a log in and password for each user. Each user will need to select a plan that corresponds to their anticipated usage per month. Laredo users are required to sign a contract and set up an account with the county. Laredo agreements may be obtained by contacting Stephenson County Clerk & Recorder's Office.

Fidlar Technologies will be on site conducting Laredo Training Wednesday, November 22nd at 10:00 am and 1:30 pm. If you have not already done so, please contact the Stephenson County Recorder's office to sign up.
